To Whom It May Concern,

I am pleased to recommend Lim Jin Bin (Admission ID: 221128Z), whom I taught in the AI and Data Engineering course at the School of Engineering, Nanyang Polytechnic. I was his lecturer for two core modules: EGT207 Machine Learning and EDT214 Applied Deep Learning.

Jin Bin distinguished himself as one of the top students in his cohort, consistently achieving Grade A across all modules throughout his three years of study. He is a bright, diligent, and highly motivated student with outstanding academic performance, strong learning abilities, and a solid theoretical foundation. He actively participated in class discussions, frequently raising insightful and thought-provoking questions that reflected his genuine interest in mastering challenging topics. His passion and determination were clearly demonstrated through his strong theoretical understanding and the consistently high quality of his practical project work.

Given his outstanding academic performance, positive attitude, and strong learning ability, I am confident that Jin Bin will excel in his future academic pursuits. It is with great enthusiasm that I recommend him for admission to your institution.

Sincerely,

Dr. Zhao Zhiqiang

Senior Lecturer & Specialist
School of Engineering, Nanyang Polytechnic
